Update: The Gift of Vision program will be hosting Kishma Alexander in June, 2007. Kishma is a 13-year old child from the Carribean Island country of Dominique. Kishma suffered from an eye disease which left her legally blind in both eyes. She needed corneal transplants in both eyes. She successfully received a corneal transplant in December of 2005. Dr. Sylvia Norton performed the surgery. She reports Kishma's vision is near 20/20 in the eye that received the surgery. Kishma will return to us to have a corneal transplant surgery in the second eye. Kishma is a special child who, despite her vision impairment, has remained at the top of her class in school. We anticipate Kishma will be accompanied by her parents for this surgery.

How to Participate: Your club can participate in this important project through a \$600.00 contribution and the appointment of a contact person from your club.

***Gift of Vision
